

Jet-Air® III

HYDROTHERAPY FITTINGS

Jet-Air III Series Spa Fittings

Interchangeable Jet Nozzles Allow Optimum Water Jet Massage Action

With the Jet-Air III system you have interchangeable jet nozzles, allowing for multiple configuration options to achieve the type of hydro-massage action you want and where you want it. And, with Hayward's adjustable Jet-Air III system, you can control the water and air flow right at the jet face. Balanced hydraulics lets you mix and match jet nozzles without affecting performance of the system. Jet-Air III for total therapeutic hydrotherapy/whirlpool action in both in-ground and above-ground spas.

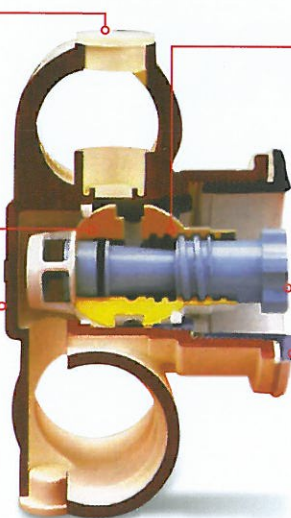

WHITE GOODS

Air Supply Access
for optional 1/2" vertical air tube (if desired) for individual fitting.

Swivel Ball Assembly
allows you to individually direct the water and air flow.

Body Housing
has PVC combination air and water connections for easy, efficient manifolding. 1" and 1 1/2" sizes.

Ball Seals and Lock Ring
hold ball securely in place and gives smooth operation while allowing for easy removal of ball/jet assembly from inside spa for future cleaning or service.

Adjustable Jet Nozzle
is fully recessed and lets you easily adjust water flow and jet intensity at each fitting.

Bulkhead Fitting
threads securely into main body housing to provide an attractive dependable compression seal on spa wall.

Jet-Air® III

The one fitting that does it all for spas and tubs – the adjustable, fully directional and recessed Jet-Air III.

Offering a choice of 1" or 1 1/2" stacked PVC socket connections for air and water. The Jet Air III installs easily with mating bulkhead fitting to provide an attractive, finished look. The swivel ball assembly is fully recessed in the wall fitting and has full flow regulation at the nozzle. The Jet-Air III gives high performance action over a wide flow range, and requires just 10 GPM for efficient operation. And, the jet nozzle assembly is removable from inside the spa for servicing.

Efficient, economical and functional, the Jet Air III sets a new standard of performance and value.

Jet-Air III Common Body Assembly

Includes combo air/water connection body, bulkhead fitting and gasket.
All connections are socket.

Model Number	Description	Ctn. Qty.	Ctn. Weight
SP1434PAKA	1 1/2" air x 1 1/2" water	25	26 lbs.
SP14341PAKA	1" air x 1" water	25	25 lbs.
SP14343PAKA	1" air x 1 1/2" water	25	25 lbs.

OEM bulk paks also available.

Jet-Air III Nozzle Assembly

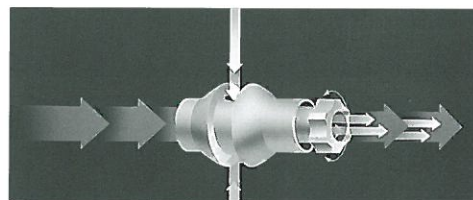

Fits both Jet-Air III and Adjustable Jet-Air III Systems

Model Number	Description	Ctn. Qty.	Ctn. Weight
SP1434PAKB	Vari-Flo Nozzle Assembly – Adjustable	25	6 lbs.
